

ADJUSTABLE HEIGHT TREATMENT TABLE (AHT)

Optional crescent head section

Multi-Adjust backrest

Bolt action quick-adjust mechanism

Shown as a 2 section table and in Gunmetal Gray upholstery

FEATURES

The Adjustable Height Treatment Table design allows for fast, effortless adjustment of the height of your table using our bolt action quick-adjust mechanism.

The desired height is achieved by lifting one end of the table at a time, and turning the bolt inward to allow it to slide into the desired position. Once in position, turn the bolt outward into the numbered slot to lock it in place. For ease of use and convenience, the slots are numbered in increments of 1" making it easy to adjust the table to your desired height level each and every time. This table is also **available as a 1 section table.**
