

CARDON CORNER TRAINING STAND

FEATURES

The Cardon Corner Training Stand is a freestanding module designed to accommodate one or two pulley systems with the goal of utilizing the corner spaces of clinics and eliminating the problematic and inflexible wall-mounted systems. By having counter-weights, stability is improved when lifting heavier weights off the weight stack. This stand allows for the attachment of the Cardon Standard Pulleys and Cardon Speed Pulleys.

Pulley systems sold separately.

CARDON CORNER TRAINING STAND
