

NEUROLOGICAL TREATMENT TABLE (NT600)

Shown in Imperial Blue upholstery

Power assisted head section

Hand held control for power assisted head section

FEATURES

The Neurological Treatment Tables have been designed for postural exercises, rolling, turning and balance training. These extra wide two section tables provide effective usage for patients who have a loss of sensation or poor balance. Also useful in treating neurological conditions; stroke, head injury and orthopaedic treatments.

In order to obtain ultimate stability and resistance to movement, we have built the NT600 & NT900 tables using lifting columns to elevate and lower the table. These synchronized lifting columns provide vertical raising and lowering which allows for total stability on the table.
