Shown in Deep Violet upholstery

Available with tray

Powered pelvic tilt seat with handheld control for patient positioning and comfort

Angled footrest for maximum patient comfort

45 years
trusted
provider.

FEATURES

The Cardon Treatment Table with Pelvic Health package is a dual-purposed table. Uniquely designed and engineered. This leading pelvic table easily transforms into our popular orthopaedic treatment table.

This innovative table features a center section with a pelvic tilt that allows the therapist to easily adjust the seat up to 20 degrees. This allows the pelvis to rest in a more neutral and supported position, providing greater comfort for the patient and allowing the pelvic muscles to stay relaxed. The pressure is also removed off of the tailbone/sacrum which is helpful for clients who experience pain in these areas or who cannot tolerate prolonged pressure there for the duration of treatment. Tilting the middle section upwards also provides great support for the clinician's shoulders, elbows and wrists; allowing their elbows to rest on the tilted pad when treating patients.

This table is designed for treating Pelvic Floor patients from both left and rightsides of the table as well as from the end of the table, and suitable for both methods of treatment. Thigh supports on the table can easily be removed to convert to a treatment table with a 3 piece head section for Physical Therapy and Massage Therapy within a multidisciplinary clinic.
