

ATLAS VI PACK AND PRACTICE

Head section extension
for massage therapy

Dual surface for the
modern classroom

Shown in Dove upholstery

FEATURES

The Atlas VI is our pack and practice table. Atlas is dual functioned, and designed for hands-on learning. The table comes with a reversible top surface: one side for writing, and the other side is padded for physical therapy practice. It is lightweight, height adjustable and easily collapsed for storage in mobile carts. Each mobile cart can store up to 5 tables.

The adjustable height design allows for fast, effortless adjustment of the height of your table using our bolt action quick-adjust mechanism. The desired height is achieved by turning the bolt inward to allow the leg to slide into the desired position. Once in position, turn the bolt outward into the numbered slot to lock it into place. For ease of use and convenience, the slots are numbered in increments of 1" making it easy to adjust the table to your desired height level each and every time.
